

Earthquake Survival Mini-Kit

As we are all keenly aware, we are in an area in which earthquakes are a fact of life. In order to prepare for and to better cope with the possibility of an earthquake in the area, we will be practicing earthquake safety drills in the classroom. In addition, in the event of an earthquake happening during school hours and with the possibility of an overnight stay at school for the students, we wish to take further precautions.

We are asking each student to provide a mini earthquake survival kit. The kit would have in it the items listed below as well as the completed information sheet found below. The kit will be stored in the classroom with kits from the other students in his or her grade level. At the end of the school year the kit will be returned to the student. **Please have students bring in their earthquake kit the FIRST day of school.**

You will need a 1-gallon Ziploc bag in which to put the following items:

- Tuna snack packs/chicken/jerky (or some other non-spoiling protein)
 - Granola bars
 - Candy bar(s)
 - Dried fruit, fruit roll ups or fruit snacks
 - Small cans of juice (no box or glass containers)
- 1 Mylar space blanket or 2 large heavy-duty trash bags (these may be used as blanket/rain protection, etc.)
 - Photo of family (to help comfort students)
 - Small toy for younger students (optional)

If you child takes medication on a regular schedule, you may include a 3-day supply along with a medication permission form.

Please detach the bottom portion and include with the 1-gallon Ziploc bag
